

* One of the conditions of event certification is that the operator posts information on their website to communicate NCAA requirements to coach and athlete participants. You are asked to do this when your application is processed, prior to the event being granted certification, because this is ECAG's only opportunity to make sure that the information gets posted and is available to all event participants.

The following URLs need to be posted on your event website to assist participants in knowing what they need to do in order to be eligible to participate in NCAA-certified events:

1. The NCAA basketball certification website and FAQ page (www.ncaa.org/basketballcertification & <https://ncaa.egain.cloud/kb/ECAG/home>) – because this page includes links to user resource quick-reference guides and manuals including guidelines and step by step instructions for participants.
2. The USA Basketball Gold License link (<https://community.usab.com>) - because all individuals involved in coaching activities will need to obtain a USAB Gold License. (Returning users should RENEW their previous account and NOT create a new one.)
3. The Basketball Certification System link (<http://bbcs.ncaa.org>) – because team organizations, coaches, and athletes need to be registered. (Returning coach and athlete users should RENEW their previous account and NOT create a new one.)
